Dr. McCullough and I recently visited the Daystar headquarters to film a powerful interview for the Rebecca Weiss Podcast.

We covered a wide range of topics — from vaccine ideology and turbo cancers to transgenerational harm and the moral collapse of modern medicine. Here's an overview:

> In this explosive interview, **Dr. Peter McCullough** and epidemiologist **Nicolas Hulscher** expose the untold history, ideology, and corruption behind the global vaccine narrative — from Cotton Mather and Louis Pasteur to Fauci and the modern mRNA era. They reveal shocking evidence of contaminated polio shots, untested childhood vaccine schedules, and the CDC's deceptive reporting tactics that have silenced doctors who dare to question "the science." Together, they uncover how fear, power, and profit created a modern-day religion of vaccinology that has replaced faith in God with faith in pharmaceuticals.
>
> Dr. McCullough and Nic also dive deep into the disturbing genetic chaos caused by mRNA shots — linking them to turbo cancers, blood clots, dementia, infertility, and transgenerational harm.
>
> They also discuss the alarming normalization of disease, the rise of autism and gender confusion, and the moral collapse of medicine that's putting children at risk.
>
> This is one of the most eye-opening conversations ever released on the Rebecca Weiss Podcast — a must-watch for anyone who values truth, freedom, and medical autonomy.
